PROFILE

I am a Data Analyst with hands-on skills in Python, SQL, and Excel. I enjoy working with data to find useful insights that can help businesses make better decisions. I have experience creating simple and clear dashboards using Power BI. I am always eager to learn new tools and improve my skills while solving real-world data problems.

EDUCATION

- Bachelor of Computer Applications (BCA)
- Gokul Global University
- 2024 – 2027

SKILLS

Technical: Python (Pandas, NumPy), SQL

Tools: Microsoft Excel, Power BI

Core Skills: Data Cleaning, Data Analysis, Data Visualization

WORK HISTORY

Fresher

Currently working on real-world datasets to improve practical data analysis skills.

PROJECTS

IPL Data Analysis

- Explored the Indian Premier League dataset to understand team and player performance
- Created Dynamic dashboards using Excel and Power BI
- Identified trends such as top players and match-winning patterns

Zomato Data Analysis

- Cleaned and organized raw restaurant data using Excel
- Analyzed ratings, pricing, and location-based trends
- Generated insights to understand customer preferences

ACHIEVEMENTS

- Completed multiple data analysis projects using real-world datasets
- Built interactive dashboards using Excel and Power BI
- Improved data handling and analysis skills through continuous practice

STRENGTHS

- Quick learner with a positive attitude
- Strong interest in data and problem-solving
- Consistent and self-motivated
